

# Harvest control rules

(FISH510.9: Principles of utilisation: The precautionary approach)

Gunnar Stefansson

January 8, 2012

## Target assumptions - harvest control rule

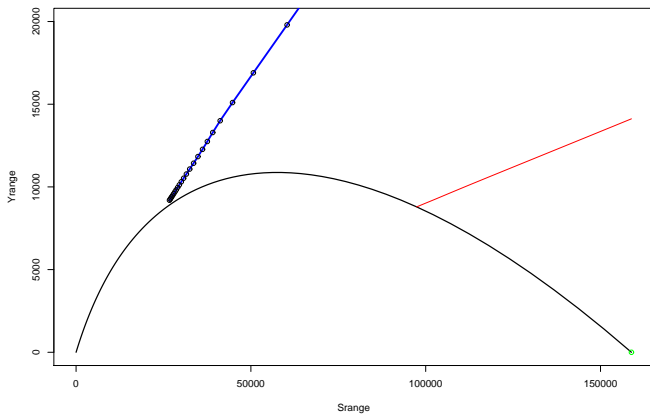

For medium-term need to assume some target, e.g.

$$F = F_{0,1}$$

$$F = F_{max}$$

or other harvest control rule

# Linking assessments and all projections

# Harvest control rules=management strategies

**CCL** Catch control law: Formula describing catch (quota)

**HCR** Harvest control rule=Management strategy: CCL with other measures

**MSE** Management strategy evaluation=Risk analysis of HCR=Medium term prediction of HCR
